CSANZ NSW EDUCATION WORKSHOP - SYDNEY

A very successful Education Workshop for CSANZ NSW members was held in Sydney on Saturday, 1 May 2021 at the ICC Darling Harbour. The participants included cardiologists, trainees, nurses and medical students with the aim of furthering their knowledge, to hear new ideas and insights, expand their teaching ability and practice techniques. Overall it was fantastic to see a reconnection with people in person!

Thank you to all our wonderful speakers who gave up their time to present on their topic of excellence (in order of appearance): Tom Ford, Bob Graham, Gemma Figtree, Michael Ward, Julee McDonagh, Andrew Sidone, Peter Macdonald, Clara Chow, Len Kritharides, Bruce Neal, Raymond Sy, Saurabh Kumar and Belinda Gray.

From the feedback, it was said that it was a good diverse group of speakers with interesting topics, the majority saying they will definitely come back in October for the next one!

COVID-19, 1 year on | A presentation by Prof Clara Chow

A year following the Australian and New Zealand consensus statement on Cardiovascular Disease and COVID-19

Professor Clara Chow
CSANZ President

Seeking Participants working in Cardiac Care settings

Our team from Western Sydney University and Centre for Oral Health Outcomes and Research Translation (COHORT) is conducting a national survey on oral health promotion in cardiovascular health settings.

Cardiac care clinicians are wanted for a study examining current knowledge, perceptions and practices towards oral health in cardiovascular health settings.

If you are a cardiac care clinician (Nurses, Cardiologists, GPs, Health Allied Professionals) who are actively practicing in the cardiovascular/ cardio-related clinical settings, we invite you to complete a short online survey. Participation in the study would take about 10-15 mins of your time.

Please click the Link Or Scan the QR Code

[Click or copy link here:](#)

or put shortened link in your

browser: <https://rb.gy/wot5tt>

A promotional graphic for Western Sydney University. It features the university's name in red and black text at the top, followed by a red shield with a white 'W'. Below this is a dark blue horizontal bar with the text 'HAVE YOUR SAY' in white. At the bottom is a large QR code.

If you would like to ask any questions or receive some information about the study, please do not hesitate to contact: Dr Jed Montayre via email: J.Montayre@westernsydney.edu.au

My Heart My Life Program

The Heart Foundation has a suite of offerings to help your patients navigate through their recovery and give them tips and advice on managing their heart health. This support program is also for family members and carers.

The My Heart, My Life (MHML) program provides education and support to people hospitalised with a heart attack or angina, via various channels, over a period of six months.

The program was implemented and tested in partnership with 38 hospitals nationally, between November 2019 to June 2020. Overall, there was high acceptability of the pilot program among participants and health professionals, with patients reporting significant rates of risk factor modification and feeling more supported throughout their health journey.

The MHML program is not a replacement for cardiac rehabilitation (either face to face, phone or web based) but aims to provide an additional method of education and support to assist patients as they transition from acute to primary care.

[Please visit https://www.myheartmylife.org.au for more information.](https://www.myheartmylife.org.au)

"This program relies on clinicians promoting the support program with their patients"

The Program is free of charge and includes:

WRITTEN
INFORMATION

Information Booklets

Easy to read printed booklets with tips and advice to help you get back to everyday life. These free resources will be posted directly to your home.

TELEPHONE
SUPPORT

Phone Support

One of our health professionals from the Heart Foundation Helpline will call you within a few weeks. They will check how your recovery is going, answer any questions you may have, and provide information and support.

SMS JOURNEY

Text Message Support

You will join our text message support program. This provides SMS reminders, prompts and ideas to encourage you to look after yourself and your heart.

REGULAR
UPDATES

Email Updates

Monthly emails will guide you through lifestyle changes and provide recipes and exercise advice. The emails also include stories from others who may have had a similar health journey to you.

ONLINE TOOLS

Online Information

Our website provides information and education to help you to understand and manage your health. Explore our videos, heart stories, heart condition web pages, and action plans.

Survey - We need your Help!

COVID has significantly disrupted the way cardiac rehabilitation (CR) has been delivered and raised questions and challenges about models of care moving forward. So ACRA can continue to support and advocate for high quality CR in Australia we need to have a good understanding of the current landscape.

We therefore urge you to complete the current national COVID impact survey.

We appreciate it is a longer survey but you have the ability to complete it incrementally over a week

(using the same computer and same internet browser ie. Chrome, Explorer).

There will be Prizes:

Prizes on offer for those that complete the survey: including a complimentary annual membership (valued at \$176) and several \$50 gift cards.

[Please follow this link to complete the survey.](#)

WE NEED YOUR HELP - EMCRs needed to identify solutions to support cardiovascular researchers!

The Australian Cardiovascular Research Alliance (ACvA) Emerging Leaders Committee are seeking your views on how to support EMCRs to thrive in CV research. You could help by taking part in a small 90-minute online focus group to help us understand your challenges and solution ideas.

[If you are willing to be involved, please follow the link to see the study information and complete an expression of interest form.](#)
