Disclaimer: The CSANZ position statements represent the views of CSANZ and were produced after careful consideration of the scientific and medical knowledge and the evidence available at the time of their dating. The CSANZ is not responsible in the event of any contradiction, discrepancy and/or ambiguity between the CSANZ and any other official recommendations of guidelines issued by the relevant public health authorities, in particular in relation to good use of healthcare or therapeutic strategies. However the CSANZ does not override in any way whatsoever the individual responsibility of health professionals to make appropriate and accurate decisions in consideration of each patient’s health condition, and in consultation with that patient and the patient’s caregiver where appropriate and/or necessary. Nor does the CSANZ position statement exempt health professionals from taking careful and full consideration of the relevant official update recommendations or guidelines issued by the competent public health authorities in order to manage each patients case in light of the scientifically accepted data pursuant to their respective ethical and professional obligations. It is also the health professional’s responsibility to verify the applicable rules and regulations relating to drugs and medical devices at the time of prescription.
